SUMMARY

Data Analyst with 2 years 10 months of experience at Accenture, transitioning into AI and Machine Learning. Experienced in analyzing structured and unstructured data, building machine learning models, NLP applications, and AI-powered web applications. Certified in Data Science through IIT Roorkee (Intellipaat), with hands-on experience in FastAPI, React, SQLAlchemy, JWT authentication, Google Gemini AI, and predictive analytics. Strong at translating data into actionable business insights and building end-to-end AI solutions.

TECHNICAL SKILLS

- Programming: Python, SQL
- Machine Learning: Regression, Classification, Time Series Forecasting (AR, ARIMA, SARIMA), NLP, Dimensionality Reduction (PCA)
- Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib
- AI & Backend: FastAPI, SQLAlchemy ORM, REST API design, JWT-based authentication, Google Gemini AI integration, PyMuPDF
- Data Visualization & BI: Power BI
- Tools: Git, GitHub, Streamlit, Swagger/OpenAPI
- Core Skills: Exploratory Data Analysis (EDA), Feature Engineering, Predictive Modeling, Statistical Analysis

PROFESSIONAL EXPERIENCE

Accenture — Data Analyst (Business Advisory Associate), Google Account

Nov 2022 – Sep 2025

- Performed data analysis and sentiment analysis on large-scale user and social media data across multiple Google products, tracking product performance and user perception
- Analyzed structured and unstructured data to identify emerging trends and customer pain points, enabling data-driven product improvements
- Delivered actionable, data-backed insights to product and engineering teams, directly influencing feature prioritization decisions
- Maintained a 95%+ quality score while managing and analyzing high-volume data pipelines under strict turnaround SLAs
- Partnered with cross-functional data and product teams to streamline analytical workflows and internal reporting tools

PROJECTS

AI Medical Report Assistant | Tech Stack: Python, FastAPI, React, SQLAlchemy, SQLite, JWT, Gemini AI, PyMuPDF

- Developed a full-stack AI-powered medical report analysis application using FastAPI, React, SQLite, JWT authentication, and Google Gemini AI.
- Implemented JWT-based user authentication and protected REST APIs using FastAPI
- Integrated Google Gemini AI to generate simplified explanations and summaries from uploaded medical reports
- Built PDF upload and text extraction functionality using PyMuPDF and SQLAlchemy for report management

Sentiment Analysis on Movie Reviews | NLP — TF-IDF, Logistic Regression, SVM, VADER, DistilBERT

- Built an NLP pipeline on 50,000 IMDb reviews comparing classical and transformer-based approaches, achieving 89% accuracy
- Deployed the final model as an interactive web app using Streamlit

Customer Churn Prediction | Classification — Decision Tree, Random Forest, Logistic Regression

- Engineered features and ran EDA to identify key churn drivers from customer behavior data

- Benchmarked Decision Tree (75.73%), Random Forest (75.30%), and Logistic Regression (73.60%) accuracy to select the best-performing model

Walmart Sales Forecasting & COVID-19 Impact Analysis | *Time Series — AR, ARIMA, SARIMA*

- Developed and compared AR, ARIMA, and SARIMA forecasting models across five stores over a 12-week horizon
- AR consistently matched or outperformed ARIMA/SARIMA on RMSE and was selected as the recommended forecasting approach

EDUCATION

IIT Roorkee (via Intellipaat) — Advanced Certification in Data Science 2025 – 2026

Vasundara Degree & P.G. College — Bachelor of Science 2019 – 2022
